Professional Experience

QuanTech SAL, LEBANON

NOV 2025 – Present

Agentic AI Solution Architect

- Designing and implementing enterprise Agentic AI solutions using **IBM watsonx** technologies, with a focus on **IBM watsonx Orchestrate**.
- Working on intelligent AI agents, workflow automation, and Retrieval-Augmented Generation systems deployed across both cloud and fully on-premises environments.
- Leading technical engagements with clients, aligning requirements, managing expectations, and providing guidance throughout the solution lifecycle.

ZAKA, Remote

AUG 2025 – OCT 2025

AI Engineer Trainee

- Developed an **AI Website Creator** that transforms plain-English descriptions into production-ready websites, enabling developers to create customized templates and helping small businesses launch informative, cost-effective websites.

American University of Beirut, LEBANON

Graduate Research Assistant

APR 2024 - JAN 2026

- Developing a deep learning optimization project using PyTorch to increase model generalization.
- Training on AUB's HPC clusters fastening experimentation and tuning process.

Graduate Assistant

FEB 2023 - DEC 2025

- Automated geological data digitization for the Geology Department, improving processing speed by 80%, and supervised undergraduate physics laboratories.

Instructor

JUN 2024 - AUG 2024

- Led instruction for **Physics 211L: Electricity and Magnetism Laboratory** guiding 30+ students through labs, ensuring safety and clarity in experimental procedures.

Education

American University of Beirut BEIRUT, LEBANON

FEB 2023 – MAY 2026

M.S. in Computational Sciences. - GPA: 4.0

Lebanese University FANAR, LEBANON

SEP 2020 – JUL 2022

M.S. in Nanoscience and Functional Materials.

Lebanese University FANAR, LEBANON

SEP 2017 – AUG 2020

B.S. in Physics.

Certifications

• Machine Learning Specialization - ZAKA

OCT 2025

Completed a 20-week Machine Learning Specialization covering Data Science fundamentals, ML algorithms, Deep Learning, Computer Vision, Natural Language Processing, and ML for production and research.

Additional certifications can be found on my [LinkedIn Profile](#).

Technical Skills

Tools & Languages: Python, MySQL, MATLAB, Latex, Git/GitHub, Docker.

Packages: PyTorch, Tensorflow, Scikit-Learn, NumPy, SciPy, Pandas, BeautifulSoup, Matplotlib, Flask, LangChain, LangGraph. **Familiar With:** Java, C, CUDA, HTML, CSS, PowerBI.

Projects

MedBot: Fine-Tuned an LLM to answer Medical Questions. Link: [MedBot](#).

Tom & Jerry Yolo Detection: Trained YOLOv11m on collected Tom & Jerry Images. Links: [Data and Model Training](#), [Deployment Repository](#), [Deployed On Web](#).

Languages & Additional Information

- Arabic: Native, English: Intermediate, French: Intermediate.
- Technology & Interests: Ubuntu Linux, MacOS, Windows. Interested in Educational Engagement and Leadership.
